INSTALLATION MANUAL

Enya recommends that a qualified trades person install this vanity to a professional standard.

The product has a comprehensive warranty against any manufacturing faults. See further details of the warranty on page 8. It is important to check the product thoroughly prior to installation for any damage or visible defects.

If defects are found due to manufacturing faults or any transit damage, then goods should not be installed and you should contact 0800 508 009, visit www.harrisonbloy.co.nz or email info@harrisonbloy.co.nz for further information. Installing the product indicates it has been thoroughly checked and condition accepted.

For correct installation, follow the instructions properly. After installation is complete, please ensure the homeowner has a copy of this document for future reference.

GENERAL INSTALLATION INSTRUCTIONS

Marble basins are heavy, natural stone products. Correct installation is critical to ensure safety, stability, and longevity. Improper installation may result in damage to the basin, surrounding surfaces, or personal injury.

Eden Stone strongly recommends that all installations are carried out by a licensed tradesperson.

You have two safe INSTALLATION options:

1. Floor-Mounted Vanity

- Use a solid, floor-mounted vanity unit specifically designed to support the weight of a marble basin.
- The vanity must have a rigid top surface, ideally stone, timber, or reinforced composite.
- Ensure the vanity is securely fixed to the floor and wall studs.

2. Wall-Mounted Brackets

- If using a wall-mounted vanity, the basin must be supported by heavy-duty brackets fixed directly into wall studs.
- Lightweight fixings into plasterboard or non-structural surfaces are not suitable.
- Brackets must be rated to exceed the weight of the basin.
- All fixings should be installed by a licensed builder or plumber.

PRODUCT CARE & MAINTENANCE

ENYA PRODUCTS ARE CRAFTED FROM MATERIALS CAREFULLY CHOSEN FOR USE IN BATHROOM ENVIRONMENTS.

TO ENSURE PRODUCT LONGEVITY, IT IS ESSENTIAL THAT YOUR BATHROOM IS PROPERLY VENTILATED TO PREVENT MOISTURE BUILD-UP. EXCESS HUMIDITY CAN RESULT IN PERMANENT DAMPNES AND MOULD, WHICH MAY LEAD TO THE DETERIORATION OF MATERIALS.

CARE AND MAINTENANCE

- Always use licensed tradespeople for plumbing and installation.
- Do not use abrasive cleaners or scourers on marble surfaces.
- Regularly dry around the waste area to prevent mineral build-up.
- Avoid placing heavy objects directly on the rim of the basin.
