Relevant Building Code clauses:

B2 Durability (B2.3.1) F2 Hazardous Building Material, (F2.3.1), G1 Personal Hygiene, G12 Water Supplies, G13 Foul Water,

Statement on how the building product is expected to contribute to compliance:

B2 - The fixture itself must last a minimum of 5 years (as it is easy to access/replace), while any concealed in-wall cistern frames must last 15 years, and under-floor drainage pipes must last 50 years.

F2 - Materials must be non-toxic and robust enough not to shatter into dangerous fragments under normal use. Adjacent low-level glass must be safety glass.

G1 - The primary clause for toilets. It mandates that sanitary fixtures are provided in sufficient numbers, use impervious and easily cleaned surfaces, and maintain a minimum 50 mm water seal to block sewer gases.

G12 - Governs the safe delivery of water to the flushing mechanism. It requires backflow prevention devices (or compliant air gaps in the cistern) to stop foul toilet water from siphoning back into the potable drinking water supply.

G13 - Dictates how the toilet connects to the drainage system. It ensures waste is carried away quickly and safely without causing blockages, leaks, or health hazards.

Limitations on the use of the building product:

Must be installed according to installation guide and be installed by a registered Plumber. Designed for domestic and commercial use. Floor mount only. Internal Installation only.

Design requirements that would support the use of the building product:

This product has been designed in accordance with AS/NZS 3500: AS/NZS 3982 and AS/NZS 6400

Installation requirements:

Installation of these products must be carried out by a Registered Plumber and in accordance with the manufacturer's installation instructions, applicable plumbing regulations and relevant NZ Building Code

Enya.nz

Maintenance requirements:

Maintenance must be carried out in accordance with the manufacturer's care and maintenance instructions. Regular cleaning should be undertaken following Enya's care instructions. Harsh chemicals, abrasive cleaners or unsuitable cleaning methods may damage the finish or performance of the product.
