Relevant Building Code Clauses:

B2 Durability, G1 Personal Hygiene, G12 Water Supplies
E3 Internal Moisture, G13 Foul Water,

Statement on How the Building Product is Expected to Contribute to Compliance:

B2 – Requires basins and their fixings to have a guaranteed minimum durability period

G1 - Requires sanitary fixtures—including basins—to have impervious, easily cleaned surfaces (such as glazed earthenware or stainless steel), proper water seals, and to be safely and hygienically located away from food or living spaces

G12 – Governs the delivery of hot and cold water to basins, including flow rates, backflow prevention, and hot water temperature management to prevent scalding

E3 – Requires surrounding walls, floors, and splash zones to manage water splashing and internal condensation, preventing water damage and mould growth

G13 - Mandates that wastewater from basins connects safely to the plumbing and drainage system with appropriate traps and waste pipes.

Limitations on the Use of the Building Product:

Must be installed according to installation guide and be installed by a registered Plumber. Refer to Installation requirements.

Design Requirements that Would Support the Use of the Building Product:

This product has been designed in accordance with AS/NZS 3500 Plumbing and Draining Standards and AS/NZS 1730 Washbasins

Installation Requirements:

Installation of these products must be carried out by a Registered Plumber and in accordance with the manufacturer's installation instructions, applicable plumbing regulations and relevant NZ Building Code requirements.

Enya.nz

Maintenance Requirements:

Maintenance must be carried out in accordance with the manufacturer's care and maintenance instructions. Regular cleaning should be undertaken following Enya's care instructions. Harsh chemicals, abrasive cleaners or unsuitable cleaning methods may damage the finish or performance of the product.
