Building Product Information

Product Name:

Enya Vanities

Product Line:

Lusso, Arlo, Avalon, Freya and Maya Ranges

Product Description and its Intended Use:

Enya vanity furniture is wood based furniture that provides storage in the bathroom and supports the washbasin. There are multiple ranges of Enya furniture, distinguished primarily through aesthetic differences, but all have common key features such as the material from which they are constructed, the drawer runner and door hinge hardware. These furniture items are wall mounted. The basis of their composition is crafted from premium solid wood multilayer board for stability, wear and water resistance. This board is more stable and outperforms waterproof MDF. Waterproof MDF does have a strong deformation resistance so is used with some carved lines in the door panels. Furniture can include a Verostone benchtop or Verostone Inset basin. (NOTE: see separate BPIR for Verostone).
