Relevant Building Code Clauses:

B2 Durability, G12 Water Supplies, E3 Internal Moisture, F2 Hazardous Building Materials

Statement on How the Building Product is Expected to Contribute to Compliance:

B2 - Requires plumbing elements and tapware to function and remain durable for their required structural/service life.

G12 - The core clause for tapware. It ensures the safe delivery of hot and cold water, prevents contamination of potable (drinking) water, and manages scalding risks through appropriate temperature.

E3 - Relates to splash and moisture control around basins, sinks, and wet areas where tapware is installed

F2 - The materials used in the construction of this product are suitable for their intended application and are not expected to give rise to harmful concentrations of gas, liquid, radiation or solid particles at exposed surfaces when installed and used as intended.

Limitations on the Use of the Building Product:

Must be installed according to installation guide and be installed by a registered Plumber. Designed for domestic and commercial use. Internal Installation only.

Design Requirements that Would Support the Use of the Building Product:

This product has been designed in accordance with AS/NZS 3718: AS/NZS 4020: G12/AS1.

Installation Requirements:

Installation of these products must be carried out by a Registered Plumber and in accordance with the manufacturer's installation instructions, applicable plumbing regulations and relevant NZ Building Code requirements.
